SAP Projects

03/2022 - 05/2022

Data migration from a C++-written ERP to S/4HANA

- Collaboration in the migration of a self-developed ERP system to S/4HANA.
- Data was transferred using Excel sheets.
- Project order from a wire processing company in Sauerland.

05/2022 - 06/2024

Pre-block optimizer - Z-application in ABAP

- Development of a bloom optimizer for a steel mill in Thuringia.
- Optimization of the rolling processes based on steel grade, loading location, minimum residual ends and technical possibilities.
- Implementation in Eclipse and SE80, integration in PPDS.

05/2022 - 03/2024

Application service - Tickets for MII-hosted UI5

- Support and solution of service tickets for an Austrian steelworks.
- Focus on input masks in the QM area.
- Implementation of a special decimal place logic to optimize the input processes.

04/2024 - 09/2024

Migration of Z applications from S/3 to S/4HANA

- Refactoring and migration of FI and IH applications to modern ABAP.
- Optimization and modernization of twenty-year-old applications.
- Implementation of the refactoring exclusively in SE80.

12/2023 - 09/2024

Collaboration in the S/4HANA Cloud expert team

- Exploring and learning the new development possibilities of the S/4HANA Cloud - Public Edition.
- Implementation of developer extensions in Eclipse and Fiori as front end.
- Creation of applications in the BTP and hosting in the S/4HANA Cloud.
- Key user extensions and CAP applications in the BTP.
- SAP Rise.

07/2024 - 09/2024

Z-application loading app in S/4HANA

- Development of the backend for a Z application using BA Toolbox for a wire-processing customer.
- Integration of the application into the LD module to manage loading.
- Barcode scanning for verification and management of loaded goods, prevention of double deliveries.
